

Company description

Seawork Fish Processors (Pty) Ltd is a Hake fishing company based in Walvis Bay, Namibia which is specialized in frozen hake fillet and chilled hake fillet processing. We also provide other seafood products like Kingklips and numerous fish species.

Since its inception, the company has always remained true to its mission of being a customer orientated value adding specialist. Currently, our company has two production facilities, one long-line vessel and five trawlers which guarantee our customers a constant supply of excellent quality Hake fish products.

Every single fish processed at our plant is being hand filleted so as to ensure that the highest quality of fish products being delivered to our customers.

Moreover, based on our innovative product development, we take great pride in our continuous growing product portfolio. We are also able to meet our customer satisfaction by looking at each individual needs regarding a top class finished product as well as specific shaping, trimming and customized packaging.
